

# Worksy

for students edition

Team members: Casandra, Diljot, Evan, Noel, Tung

# The vision

In a world where many students face challenges due to limited experience and professional networks, Worksy emerges as an indispensable solution. Worksy is committed to bridging the gap between students seeking valuable work opportunities and business owners in need of specialized services.

# Summary

Within the Worksy platform, students can showcase their skills and proficiencies, enabling clients to select the best candidate for their needs. Through connections with forward-thinking business owners and entrepreneurs, students not only experience financial growth but also enrich their professional journey. The main feature of our application is the ability to do a robust search, allowing users to easily discover products or services by applying filters and sorting options. Posting on Worksy is crucial for communication between users, providing a platform to create listings, ask questions, negotiate, and leave reviews. Users can personalize their accounts to manage posts, chats, and bookmarks. The chat feature facilitates seamless interaction between students and clients. Lastly, the review system benefits both students by building a positive work history and clients by establishing trust in their choice of service providers.

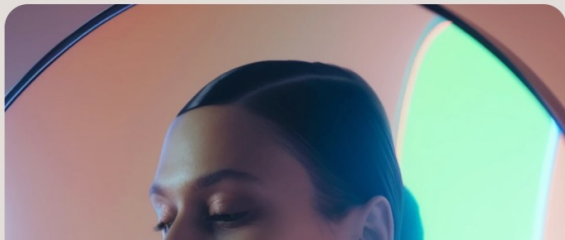

# Target Customers

**Students**

**Alumni**

**Business owner**

**Entrepreneur**

# Core Features

1. Search
2. Post
3. Account
4. Chat
5. Review

# Search

- **Search a service by keywords**
- **Search for a service by categories**

# Post

- **Create my own service offering to attract the potential buyer**
- **Make changes to my service offering so that it's up to date**
- **Delete my listing so that my services are up to date**

# Account

- **Create an account to ensure that my content and interactions are kept private**
- **Login to my account so that I only see the content relevant to me**

# Chat

- **Message potential buyer/seller to inquire about a service**
- **View my chat history so I have a record of my messages**
- **Receive notification when someone sends me a message so I can be up to date with my communication**
- **Delete conversations I no longer want so I can keep only relevant conversations**

# Chat

- **Submit a review for the service I have purchased so I can provide feedback to the seller**
- **Have the option to rate the service I have purchased so I can provide feedback to the seller**

# Thank You
